SCACCOMATTO

Chess Table

Description

Scaccomatto is a multifunctional contemporary chess table.

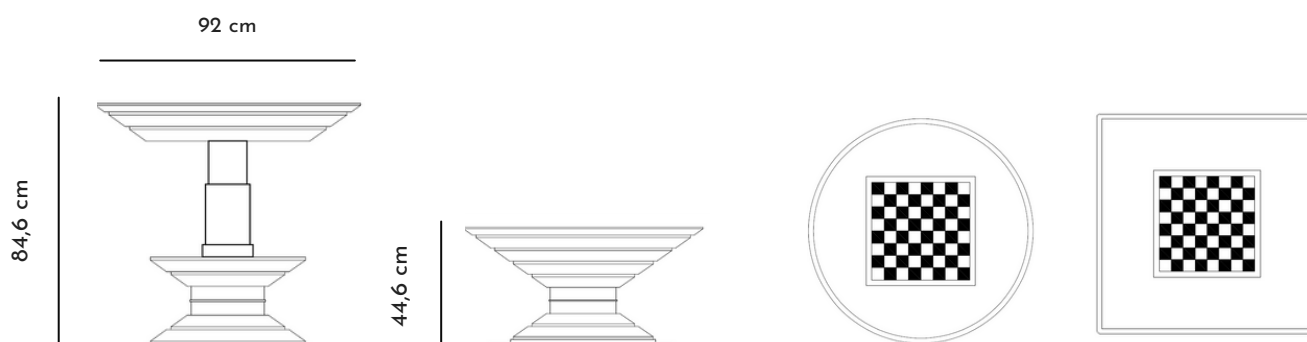

It features a pop-up mechanism directly rechargeable from home electricity; the top can move up and down, and the table can reach different heights in order to use it for different purposes.

The movement is managed by a button placed on the side, or it can work thanks to an optional remote control.

In the inside space are located chess, checkers and backgammon sets. The chessboard is elegantly inlaid with ebony and mother-of-pearl and covered with tempered glass.

The game pieces are made of turned and anodized aluminum, exclusively designed by Vismara.

The table is available in round or squared shape, with or without mechanism.
